LD 1730

Dear Legislators

I am writing in support of LD 1730

Our electrical costs in Maine are going through the roof, making life terribly challenging for the average citizen. We need to be bold and innovative; half measures aren't getting us anywhere.

LD 1730 offers a step forward, accessible to many citizens.

As I understand it, this method of plug in solar technology is widely available in Europe. We shouldn't allow the energy giants to determine our future and keep us perpetually chained to fossil fuels.

Thank you for your consideration

George Schelling
