

Patrick Conlon
Biddeford
LD 287

It is good to see this legislation has resurfaced from the former LD 1756. I am supportive of all the aspects of this legislation and particularly in support of meeting ADA standards with sidewalks, expanding bicycle facilities, improving sight lines for motorists to see pedestrians and cyclists and adding facilities within population centers.

Also consulting with municipalities as designated in section B and the goal of eliminating serious and fatal motor vehicle crashes.

All of this makes sense if we really care about safety on our roads in the state. Please support!

Thanks
