I'm not in support of child and family services being just for children I need it to be for developmental disabled adult children so creating a separate child and family services can be for all in one no more adult protective services just child and family services and it would help so the parents of adult children that are special needs that can't take care of themselves to have reunification services and child and family services can petition for parents to get parental rights and responsibilities and place them into children homes and child and family services will be for abusive parents of developmental disabled adults to have more power to protect them because adult protective services has less power they got to petition the court and the judge can deny emergency guardianship and adult protective services don't do reunification for parents that are good to their adult children with disabilities autism and I am in support for amendments to this bill and rewrite some of language of the bill for child and family services for developmental disabled adult children over 18 years old past 18 years old until they are a lot older maybe even 50 years old depending on developmental disabilities how severe they are and also place younger adult children with developmental disabilities over 18 years old like 27 years old into a foster care facility and also for developmental disability's adults that can't take care of themselves at any age due to their developmental disabilities and I really think ought to pass as amended based on this testimony that I wrote would be great my son would love this
