Hello I am a current DSP. I have seen how good these programs can be and how helpful these programs can be. But I have also seen how people who work these jobs can struggle as the cost of living increases. Bills have been getting higher and prices have inflated greatly. An increased pay would help DSPs to properly meet their needs. Being able to afford food and shelter will allow us to come into work healthy and ready do our job to the best of our abilities. Being able to keep the heat on would help me keep my self from getting sick so I can keep coming in and supporting those who need it, as well as keeping them safe from illness. Please help give the supports the support they need
