LD1383- An Act to Require State Divestment from Perpetrators of International Human Rights Violations

Maine's state motto is dirigo, or 'I lead.' There is no better way to lead than divesting from genocide. I cannot describe how disgusted I have been watching the United States actively fund and support the genocide in Palestine for the last 838 days. We are one collective community around the globe, so genocide perpetrated anywhere is felt by all of us. It is making us sicker, and it is making the lives and futures of Palestinians miserable and impossible.

This is a perfect opportunity for Maine to divest, and could be a watershed moment for the country as a whole. Maine must stop funding genocide, land theft, and ethnic cleansing. It is the right thing to do. Pass LD 1383.
