The state sanctioned violence that is occurring abroad is heinous, extremist, and fulfills no end but to further bloodshed and hardship at the behest of imperial and fascistic agenda, both of which should be seen as harmful to our democracy and antithetical to our modern society. The horror that our tax dollars have already inflicted is beyond comprehension and must be stopped through divestment and other legislative action. Please join me in support of this bill to divest from this deeply disturbing murder campaign and ethnic cleansing.
