

Linda Stathoplos  
Wells  
LD 2112

I support LD2112. I'm from Wells, Maine, and I support choice in electricity procurement, which LD2112 provides. Should a municipality choose to form a Community Choice Aggregation Program, LD2112 provides more flexibility to make electricity purchases compared to the Maine PUC standard offer. LD 2112 supports competition in the electricity market, and allows local control that can help with price stability for participating municipalities.
