Divestment is one of the most effective tools of nonviolent protest to put an end to the genocide we've been funding in Palestine for the past two years. Don't let the so-called ceasefire fool you. Israel has murdered over four hundred civilians since it began, including one hundred children, and the IDF has continued to target journalists. Ten thousand Palestinian civilians, including healthcare workers, continue to be held in Israeli torture camps without charge. Israel has refused to open the borders to let in the agreed upon amount of humanitarian aid. The lack of food and supplies has continued to kill Palestinians, and babies in Gaza keep dying of hypothermia. Israel has also continued to demolish entire neighborhoods, not to mention the UNRWA headquarters in the West Bank. Not passing this law is not an option for anyone who doesn't want to be complicit in the most sadistic livestreamed genocide of our time. Thank you.
