LD 2074

Testimony of Ketsia Kabela
Health Coverage, Insurance and Financial Services Committee
LD 2074 – HP 1387: An Act to Update the Requirements for Social Worker
Licensure
January 27, 2026
Representative Mastraccio and Honorable Members of the Health Coverage,
Insurance and Financial Services Committee,
My name is Ketsia Kabela. I am a resident of Saco, Maine, and I am currently
employed with the State of Maine Department of Health and Human Services in Child
Protective Services (CPS). I am here today to express my strong support for LD 2074,
An Act to Update the Requirements for Social Worker Licensure.
This bill is critically important to me and to many others who want to serve the
citizens of Maine as social workers. I have been employed by the State of Maine for
one year and have had the privilege of working closely with children and families.
However, my current position has limitations, and I want to be able to offer more
direct support and responsibility in serving vulnerable populations.
I hold a Bachelor's degree in Political Science and have extensive experience in child
welfare. Prior to working in Maine, I served as a case manager for unaccompanied
minors in the state of Colorado. Despite my education and professional experience, I
am currently unable to work as a CPS caseworker in Maine solely due to the title of
my degree.
I was informed that I could apply for a conditional social worker license. Before
submitting my application, I was advised by a Department employee that I needed to
complete additional coursework to be eligible. While working full-time and often
overtime I enrolled in and successfully completed several social science courses
online through York County Community College. I earned strong grades and paid all
related expenses out of pocket. I followed this guidance in good faith, believing I was
meeting the licensure requirements.
Two months after submitting my application, I was informed that the Board does not
accept coursework taken outside of an earned degree. This decision was both
surprising and disappointing, particularly because the staff member who guided me
through the process was also unaware of this policy. When rules or policies change, it
is only fair that both applicants and staff are clearly informed. In this case, the lack of
communication resulted in confusion and unnecessary financial burden.
Additionally, there are employees within the Department who hold Political Science
degrees with similar coursework who were approved for conditional licensure and are
currently working as caseworkers. This inconsistency makes the denial of my
application feel inequitable.
I strongly believe that the passage of LD 2074 will create a clearer, fairer pathway for
qualified individuals to serve children and families in the State of Maine. This bill
would allow dedicated professionals like myself to continue serving our communities
more fully and effectively.
Thank you for your time and consideration.
Respectfully,
Ketsia Kabela
