

I am writing in support of LD 2106.

It is critical that we keep limitations on immigration enforcement at sensitive locations like schools, healthcare facilities, daycares and libraries. Requiring a valid judicial warrant signed by a judge in order to conduct enforcement is crucial. These are places where people need to feel safe. Children need to feel safe. Everyone should be able to access these locations and the help they provide without being scared for their lives. It is a matter of public physical and mental health. People should not have to live in fear of taking their children to school or getting the healthcare they need.

I urge you to vote ought to pass on this very important bill.

Thank you for your consideration,

Johanna Davis
