

Lee Gernon-Lakin  
Unity  
LD 2106

As a parent of a school she child, a neighbor of immigrants, a PA, and a citizen, I strongly support legislation that would protect schools, libraries and health care facilities against warrantless searches, especially when the agencies charged with enforcing immigration in our country are showing the auto be lawless and racist. Children need to be safe to learn. Further, they are innocent; they did not make the choices that determine their legal status. My patients deserve medical care, regardless of their nation of origin and citizenship status. Medical care is a basic human right. My foreign-born colleagues should be able to come to work without having to wonder if they will get home safely.

For all of those reasons please vote in favor of LD 2106.
