

Katie Goossen  
Morrill  
LD 2106

My name is Katie Goossen. I am a teacher and I have 2 student in our local school district. Our schools are a place were children come to feel safe. They come to school to have reliable food and warmth. They come for security and support. Parent depend on our schools to keep their children safe and know that when they drop their children off at school to go make money to put food on the table, they will be able to find them were they left them. Allowing people into these schools without a judicial warrant is unconstitutional. Please support LD 2106 to help keep schools, hospital and care facilities a safe place for our community members.

I am concerned that our teachers and staff members at our schools do not have enough guidance on how to handle these situations and in their already over whelmed day, having a clear law in what to do would help teachers and administrator to have confidence in handling yet another impossible situation in the schools.

Please help pass Bill LD 2106 to support students, teachers, administrators and families. All families within the schools need to know they are safe and cared for.
