

LD2106

An Act to Prohibit the Disclosure of Nonpublic Records Without Proper Judicial Review

Dear Judiciary Committee Members,

I am writing in support of LD 2106 which seeks to protect Maine people from current federal actions in our state that threaten the well-being of families and put the general population at risk of violence as ICE and other Homeland Security employees endanger the populace and break the laws of the United States and Maine.

It is important to insist on our constitutional rights and civil liberties at all times but there is an emergency right now. No one should have to produce citizenship papers in this country without due process which requires a judicial warrent according to the laws of the land.

ICE and Homeland Security have detained persons who show legal eligibility to reside in Maine. They have caused road hazards such as leaving abandoned vehicles in the middle of streets. They spread fear, disrupting schools and workplaces and as a direct result, blocking commerce and educational institutions from operating.

I strongly support this effort to ensure Maine people are secure in their persons, homes, workplaces and institutions.
