

Hadriane Hatfield  
South Portland  
LD 2106

My name is Hadriane Hatfield, and I am testifying in support of LD 2106. This bill would protect public health and safety by ensuring responsible stewardship of personal data and effectively reinstating previous bi-partisan protections from deportation at places of education and healthcare recently stripped by the Trump administration. In addition to protecting nonpublic records, LD 2106 would prohibit ICE from entering public schools, hospitals, healthcare facilities, daycares, and public libraries, except in the case of a valid judicial warrant signed by a judge.

We have seen ICE arrests near schools in Portland. Local kids are not going to school because they are afraid. People are not going to the doctor when they need medical attention. We cannot live in a community where some of our neighbors are afraid to meet basic needs. Please vote "ought to pass" to protect access to education, healthcare, and community.
