LD 2106

My sincere thoughts for getting this proposed Bill LD2106 passed as this is how our state of Maine should continue to always conduct business. We have always been thorough and THOUGHTFUL in how residents of this state are treated. This bill gives a bit of dignity and respect to those that are within our public domains. Not only for those being served with certainly a judicial warrant, but those that may be present during that process. Legal means and care should be given to everyone in this state at all times.

I implore that a vote for LD2106 be made into law. As the state of Maine's moto reads: The Way Life Should Be....this should stand for everything.
