I was in the military 20 years, all warnings and cautions are written in blood. We have the answers. These incidents are a result of complacency that is rampant in public education. In fact, I messaged RSU67, June 5 2025 and advised them to shut down due to their complacent nature in regards to background checks. We trusted you with our children. You have failed. There is absolutely no excuse for complacency. Complacency is a conscious decision. Maine is absolutely shameful as displayed by DHHS, and the public school system. You are too concerned about demonizing parents who tell their children they are perfect in the body they were born in, to even address actual abuse, bullying and real world dangers that occur within the public schools. I'm ashamed of this state and horrified for the families who have lost their children.
