

Rachel Casey  
Gray  
LD 2106

Dear Members of the Judiciary Committee,

I respectfully submit this testimony in support of LD 2106, which I believe is a common sense approach to ensuring the safety and rights of Maine residents.

Not only would this bill protect school children, but it would also protect adults who are working hard to further their education at colleges across our state. I am a faculty member at the University of Southern Maine, and some of my students are too terrified to come to campus. If we do not put measures in place to protect students of all ages against ICE, we're asking students to make an impossible choice between their education and their safety.

LD 2106 will protect the rights of our students, faculty, and staff, and allow learning to continue. Thank you.
