LD 2106 Judicial Review of ICE Operations in Maine

Every person in Maine is protected by our national and state Constitution. Through mismanagement, wrong information and poor training, ICE agents have been illegally entering homes, schools, places of worship, hospitals, libraries and daycares without judicial warrants trampling on the 4th amendment rights of the people in those places. This is wrong and this needs to STOP immediately.

When immigration work is done right, there is no need for masks, hidden identities, zip ties, and rough tactics.
