

Kristina Buckley  
Portland, Maine  
LD 2106

Schools, hospitals, libraries, and childcare centers offer essential services to our communities. It should go without saying that those spaces should be safe and accessible places for all of Maine's schoolchildren, teachers, healthcare workers, and neighbors. Allowing immigration agents into those spaces not only jeopardizes the immediate safety of members of the immigrant community but all individuals of any status, including U.S. citizens. It is imperative for us to put measures in place to protect our community members in these vulnerable spaces from potential for physical harm, and from having their sensitive information disclosed to immigration agents. I support LD 2106 - An act to prohibit the disclosure of non public records without proper judicial review, to secure a layer of safety for these spaces and the populations they serve.
