LD 2106

Please pass LD2106. Please ensure that ICE cannot enter schools, daycares, hospitals, libraries and health care facilities without a judicial warrant. We cannot have a state where children and adults live in fear trying to get an education or taking care of their health. We are traumatizing generations of Maine residents. Not only are children terrified, teachers, librarians, health care providers are experiencing unnecessary stress worrying and planning for how to protect their clients, students and patients. Students have been absent from school and employees are missing working due to fear of ICE. Passing LD2106 will help ease the pressure on everyone impacted.
Protect Maine residents!
