I believe that everyone, no matter their political views, wants schools and hospitals to be the safest places you can go in our community. That schools are places where parents send their kids without fear, and children don't feel terrified for their safety, the safety of their classmates, or their parents. Children should never be subjected to immigration enforcement or be taken by immigration without their parents. That's cruel and inhumane. Hospitals and medical offices are a place of care, safety, trust and privacy for every single person. These are basic tenants of a vibrant, safe and healthy society and community. No one is safe when some of us are living in terror. No one is going to be well, if some of us are being hunted. We must do everything we can at the local and state level to protect our constitutional rights and keep our community safe from cruel and unconstitutional federal immigration enforcement. I want to live in a city and a world that deeply cares about its children, its sick, its families, and centers their safety and well-being in its legislature. Thank you.
