We have lived on Lake Cobbossee in Manchester, Maine since 1960 and it has been a blessing for our family for 3 generations. Unfortunately our lake and the community is under attack by invasive species. Our community has been fighting these plants and raising money to do it, but it's not enough. The state can hopefully Holland the state will be helping all of Maine's lakes by doing so. Maine's lakes are an engine for growth for the state. The lakes support so many businesses and generate tax revenue. Please help us keep our lake healthy.

Best,
