LD 2106

I support LD 2106 which will guarantee proper judicial review of ICE operations in Maine. What we have seen in Minnesota is also possible here and indeed ICE operations are happening but not getting the same national news reporting.

Having lived and worked in Latin America I have learned about uncontrolled action by governments against citizens. Fear for the safety of ones children and family members erodes the well being and functioning of society.

I oppose ICE operations without valid Judicial warrants. We need our schools, hospitals and healthcare facilities, daycare centers and libraries to places of safety for conducting our lives and work.

Everyone regardless of immigration status, should be able to go to work, attend school, go to a doctor's appointment, or simply visit their local library without fear or the threat of intimidation from ICE.

Thank you for the opportunity to express my support of LD 2106!
