

Miranda Chadbourne
Lewiston
LD 2106

I am testifying today in favor of LD 2106. The increasing and dangerous immigration and boarder patrol raids are causing the People of Maine to fear accessing medical care. Many employees of health care organizations are not attending work out of fear of ICE and Boarder Patrol activities. Our patients, are scared to get medical help, and our colleagues are scared to attend work, out of fear of being targeted, threatened, abducted, detained or killed. Please help protect our patients and health care team members.
