Dear Members of the Joint Standing Committee on Environment and Natural Resources

Re: LD 2141

**My name is Richard Dressler and I am writing in support of LD 2141 - An Act to Direct a Portion of Unclaimed Beverage Container Deposits to the Lake Water Quality Restoration and Protection Fund, the Maine Working Farmland Access and Protection Program and Public Defender Office Staffing.**

For more than a decade, I have been a member of the **Greater Pushaw Lake Association** (GPLA) <https://www.greaterpushaw.org/>. GPLA's mission is to preserve and improve the quality of Pushaw Lake and Little Pushaw Pond. We represent almost 800+ households and four towns around these lakes. GPLA volunteers have been working hard to: assess water quality through routine water testing throughout each summer; work cooperatively with landowners through our volunteer LakeSmart program to reduce pollution of lakes from runoff and failing septic systems; monitor for invasive plants; and prepare two newsletters each year to inform the public about our efforts and to solicit their support. These and other efforts are needed to keep our lakes clean for all users, including wildlife, boating and fishing, and to maintain property values on the lakes for landowners and for towns relying on property taxes.

Resources currently available to protect our lakes are limited so the funding proposed in LD 2141 is needed to keep our efforts going. We and other organizations, such as Lakes Environmental Assoc., Maine Lakes and Lake Stewards of Maine, etc. rely heavily on assistance from Maine Department of Environmental Protection to keep our lakes safe and clean. **Please invest in the healthy future of Maine's lakes to protect our lakes for all who use lakes in the future. The funding provided in LD 2141 will help assure a healthy future for Maine's precious lakes and ponds.**

Thank you for acting favorably to approve this funding!

Richard Dressler  
Glenburn, Maine
