Support for LD2106

I am testifying in support of LD2106 to ensure proper judicial review of ICE operations in Maine. This reign of terror by ICE is unlawful, unconstitutional, and deeply unAmerican. Our public schools, healthcare, childcare facilities need policies and guidance from the state to know how to respond to these unprecedented and dangerous attacks on citizens and families in their care. ICE should be prevented from conducting immigration enforcement without a valid judicial warrant in schools, hospitals and healthcare facilities, daycares, and libraries. It is completely against the HIPPA privacy act for ICE to obtain private records. Please pass LD2106 to support a more sane way of dealing with the situation for all the people in Maine.
