

Althea Turner  
South Portland  
LD 2106

As a social worker and resident in southern Maine, I have witnessed first hand instances of our community members not being able to access critical medical care for fear of ICE. I have witnessed students stay home and miss out not only on education, but critical support of basic essentials for themselves and their families. This law would allow for some semblance of safety to return to Maine and ensure access to critical care for our most vulnerable residents. I urge you to stand up for our community and side with humanity by passing LD 2106. Thank you.
