Freeport, ME  
LD 2106

Dear fellow Maine residents,

I am writing in support of LD 2016. While hospitals, day cares, schools, and libraries may currently be considered public spaces, those attending these spaces should be afforded the freedom to attend or seek care without the fear of government agencies. The behavior of Health and Human Services personnel has been unlawful and unconscionable, denying humans basic rights and those rights afforded by our constitution to all. As the federal government seems to have sacrificed our rights to meet some unknowable goal, it is incumbent upon our state leaders to step in and provide protections.

Thank you,  
Valerie Williams
