Please don't make us any more afraid to send our children to school than we already are. Today, every day when I send my son on the bus, I think about the possibility of a school shooting. ICE is no longer about immigration. ICE does not follow laws. We cannot be allowing ANYONE who doesn't follow laws into our schools. What if they really do follow laws? Even if everything was legal and went as planned, our children would still be traumatized if their classmate or classmate's parent was dragged away in front of them. There is no valid reason to allow them in our schools. We don't need ICE, who is armed like they are going into Iraq, in our schools. Leave our poor teachers and kids alone. Ask yourself this - when your grandchildren asked what you did during this time.... will you be proud or ashamed? Think about that before you vote.
