I am a Maine resident, US born citizen, parent of an immigrant.

I believe this "ought to pass" because in my faith, the inherent worth and dignity of all people is paramount. The current administration does not share this belief. People of color, children, and every single one of us - citizens and those going through the immigration process do not need to live with this level of fear. My family has been carrying our child's documents with us. That is insanity - especially in the home of the "brave and the free". The State of Maine needs to protect us when the federal government clearly is not. Children should be safe in school, at libraries and everywhere in Maine.

Thank you for moving this rational, reasonable legislation forward.
