

Kelly Kirchner
Portland
LD 2106

After my husband witnessed a man being dragged out of his car, window smashed in, in downtown Portland, I've been struck by the tragedy, the waste, and the hypocrisy of this administration and its DHS operations. It turns out that the man detained was a UMaine graduate here on a work visa. While this administration has stripped federal protections under the guise of giving power back to the states, they turn around and send federal agents to impose their agenda on Maine and our community. With agents who are untrained and acting with impunity, I support LD 2106 and any effort to create safe spaces here that protect vulnerable Maine residents from broad and indiscriminate immigration enforcement.
