LD 2106

To the judiciary committee,

I am writing to express my support of LD 2106, a bill to keep ICE out of hospitals, schools, libraries and daycares. I, like many Mainers, was surprised to learn that this is isn't already common practice. I feel very strongly that this act must be passed due to discovering that this was one of Trumps first executive orders that removed these protections.

In just the most recent days ICE officers have murdered two people in Minnesota. ICE officers also detained a Cumberland County correctional officer who is here legally. ICE officers are kidnapping citizens and legal immigrants without warrants or justification. At the very least we should be slowing down ICE's illegal activity and creating a sanctuary location for all Mainers to feel safe.

LD 2106 is a necessary step to keeping our citizens in Maine safe especially our children and slow down ICE's illegal behavior.
