Emlyn Emerock
Norway
LD 2106

My name is Emlyn Emerock, I'm a resident of Norway, and I give my full support to LD 2106. Access to education, childcare, and medical attention are human rights. No one in Maine, regardless of their immigration status, should be afraid to go to school, seek medical aid, or leave their child at a childcare facility. When families don't feel safe in public spaces, the emotional, mental, and economic impacts harm everyone in our communities. We must uphold common sense policies supported by past Democratic and Republican Administrations alike that require a judicial warrant and just cause before entering public spaces such as public schools, public libraries, health care facilities, and child care facilities. LD 2106 will not obstruct lawful immigration enforcement; it would reinforce due process and protect our public spaces for community safety.

I urge you to support this bill and uphold our basic human rights.
