LD 2106

I am writing in support of LD 2106, a bill to keep ICE out of hospitals, libraries, schools and daycares. The Trump administration is stripping protections away and the state of Maine needs to step up and fight for these locations to be protected from an overstepping, violent federal organization. ICE are kidnapping people here legally, people with no criminal records, as well as U.S. citizens and are doing so without warrants and with total immunity. We need to put as many protections and stopgaps as possible to slow down this lawless campaign of terror.
