I am speaking in favor of this proposed legislation as a mother of one child with Autism Spectrum Disorder and one child with Intellectual Disability and other health impairments and who goes to Margaret Murphy's school. Both of my girls need the safety and especially the stability that goes into the expectation of dropping off your children at their schools without the fear of masked, geared up, and carrying weapons mostly men shouting and pounding the glass doors of school, daycares, or the public buildings. Or when they leave those buildings, to be taken off those public sidewalks. I will speak more on my child who goes to Margaret Murphy's.
