LD 2106

To the judiciary committee,

Today, January 29th, I'm writing to support LD2106. I believe that ICE should never be able to show up to places such as hospitals, schools, or daycares to prey on vulnerable people as they have been showing to be doing. What we as the public have been witnessing first-hand through social media, and more recently mainstream news, is a crime to humanity and something must be done. ICE is illegally kidnapping US citizens and withholding human beings of their birth rights.
