LD 2106

I am submitting testimony today in favor of LD 2106. This act would require ICE to have a valid judicial warrant signed by a judge to conduct enforcement at schools, hospitals, healthcare and daycare facilities, and libraries. Except for special circumstances, these spaces have been protected for decades across administrations of both parties. LD 2106 would also protect people's information that might be held at those places. Importantly, the bill also provides guidance and support to teachers, healthcare workers, and other employees at these locations, ensuring that they are not put into crisis situations and forced to make individual decisions.

Without this act, people are afraid to leave their homes, even to buy food and access medical care. Children are afraid to go to school. As a former teacher, I urge you to pass this bill to protect everyone.
