

Ann Johnson  
Belfast  
LD 2106

Dear Committee,

I am a nurse who has worked in Maine hospitals and doctors offices as well as in schools. Feeling safe is imperative in those places. If these places become unsafe, places where ICE can (without a valid judicial warrent) come in and take people away, we risk having people avoid health care and education. Is that what we want for this state? We need a population that is healthy and educated. These should be the values that we support. Keeping those places safe is how we show that we value health care and education. I highly encourage you to pass LD 2106.

Thank you.
