I live on Cobbossee lake. I grew up on this lake and brought my children here during the summers of their youth. Cobbossee has very special family memories of water skiing, swimming, etc. It was so special to me that when I retired, I moved back to Maine to live on Cobbossee. I hope to create even more special memories with my children and future grand children. I would hate to see Maine loose the value and quality of such a natural resource to anything that would hurt the lake, like envasive plants , fish, etc. I urge you to support this protection with a positive vote on the \$2M funds you are going to review.
