

William Spiller
Wells
LD 2141

My Name is William Spiller and I own a small farm in Wellls, Maine. We have a agriculture conservation easement. I am very glad because after we put it on the farm we have had a lot of pressure to give a lot to friends and relatives.

The lot prices in this area are very high and many people cannot afford lot and then have resources to build a home.

WE want to preserve our farm for future generations. So by having this easement it makes it easy to say we cannot give or sell any land.

I think that LD 2141 will give some other farmers the same chance that to protect their agricultural the same way for future generations. WE are losing this land at an alarming rate and I think that preserving it maintains the Maine culture that we all love. Bill Spiller
