This bill will kill small businesses and will end up hurting patients as well as they lose smaller growers that care and grow with passion and intent for helping people. Metrc and testing is not the answer it's been clear with product recalls on the adult use side it didn't work for them it's just going to help larger companies that can afford to pay for all of this testing.

This effort by ocp and corporate lobbyist has been squashed almost annually by patients and caregivers that care and do not want to see large corporations run this market. I personally am not opposed to testing but not like this it should be similar to audit testing like in many agricultural industries where the cost of testing isn't solely on the small business operating in the respective industry.
