

Aiden Labbe  
Falmouth  
LD 1847

Hello,

My name is Aiden Labbe, I am a student of sustainable agriculture at the University of Maine. I have worked in the industry, and been a patient for almost three years. My daily life is significantly improved by access to high-quality solventless extracts, at an affordable cost. These products would be roughly three times past the mg allowance set by LD 1847. Also as someone who would like to join Maine's largest agricultural industry, METRC and the effect it would have on this small but mighty industry scares me.

Thank you for your consideration and I hope you vote NO on LD 1847
