Raymond
LD 2141

As a lifelong seasonal resident of Maine, property owner and soon to be full-time resident, I am writing in support of LD2141. The tourist industry is the life-blood of the state, and the attraction to its lakes are the dominant reason why. It is therefore of primary importance that we do all we can to improve and maintain the health and beauty of those lakes. Having a stable financial support system to do that is both reasonable and necessary. No one wants to vacation on a dirty, unhealthy and stagnant lake full of invasive plants and sick fish. This bill would help to ensure this won't happen. Thank you.
