

Testimony 2/2/2026

Senator Tepler, Representative Doudera, Members of the Joint Standing Committee

My name is Jane Herbert I am a concerned citizen and resident of Damariscotta. I am in favor of LD 2115 with one exception.

My concern is the provision of bottled water for those with contaminated wells. Single use plastic water bottles are a big source of PFAS contamination. My hope is glass containers are specified.

The State regulates and oversees landfills in order to protect the environment thus contamination of wells from landfills mandates repair by the State. LD2115 insures Maine residents access to clean water if their well proves to be unsafe due to landfill contamination.

Thank you,  
Jane Herbert
