LD 2070

LD 2070 ought to pass. The Environmental Protection Agency publishes this advisory on <https://www.epa.gov/wetlands/why-are-wetlands-important>
'The holding capacity of wetlands helps control floods and prevents water logging of crops. Preserving and restoring wetlands together with other water retention can often provide the level of flood control otherwise provided by expensive dredge operations and levees.'
Expanding a landfill into wetlands, as in the case of the Juniper Ridge Landfill ignores this advisory, jeopardizing the property values of voters who will be affected by newly-created stormwater runoff. Please protect their interests by passing LD 2070.
