Re: Testimony in Support of LD 2064 – An Act to Expand Access to Early Childhood Nutrition by Establishing a Grant Program for Public Preschools

To: Joint Standing Committee on Education and Cultural Affairs  
Senator Rafferty, Representative Murphy, and Honorable Members of the Health and Human Services Committee

On behalf of the Maine Community Action Partnership (MeCAP) and the Community Action Agencies serving all sixteen counties, I write in strong support of LD 2064, An Act to Expand Access to Early Childhood Nutrition by Establishing a Grant Program for Public Preschools. This legislation is essential to ensuring that all children enrolled in public pre-K programs, regardless of setting or location, have equitable access to nutritious meals.

Currently, due to restrictions within federal child nutrition programs, community-based public pre-K classrooms are ineligible to participate in the universal school meal program. As a result, many providers operating outside school facilities face high costs to supply daily meals. LD 2064 addresses this critical gap by establishing a grant program that enables community-based programs to provide breakfast, lunch, and a snack for every enrolled child.

The bill also reinforces Maine's commitment to a mixed-delivery model for public pre-K by ensuring that community partners, who are essential to reaching rural areas and communities without school-administered pre-K, have the resources needed to meet state standards. Without this support, providers are forced to absorb substantial meal-related costs, which can lead to financial strain, reduced meal quality, and, ultimately, negative impacts on children and families who depend on these services.

Importantly, LD 2064 also establishes infrastructure grants to help programs build the capacity needed to prepare meals and manage nutrition services effectively. These supports are crucial for community-based providers, who shoulder responsibility for meal preparation and distribution without access to the purchasing power or facilities available in school-based programs.

Passage of LD 2064 offers a practical, state-level solution to a clearly identified federal funding gap and ensures that all Maine children in public pre-K have access to the high-quality nutrition they need to learn and thrive. We respectfully urge the Committee to advance LD 2064 in support of equitable, high-quality public pre-K for every child in Maine, regardless of income or geographic location.

Thank you for your consideration,

*Victoria D. Forkus*
