This bill would be amazing to assist with K-9s that have served their communities. The care is often placed on the handlers and with this bill it will truly help give these four legged heroes an extended, healthy life past their careers. These K-9s have saved lives, taken narcotics off the street, assisted in solving countless crimes and have helped build community relations from the work they do with the community. This funding of essential post-retirement care will help ease the financial burden that officers and care providers take on. It will also show that their service is valued by the public they serve. Currently I pay almost \$900 a quarter for my retired K-9's health care and I can't tell you how refreshing it is to see a bill like this presented for all the K-9s that serve their communities. Thank you for the consideration of this bill. This will surely send a message to the people that care for some of the hardest working assets that departments have.
