I am writing in support of this bill. The federal government's recent detaining of people without cause has been devastating to our communities of color. The State of Maine needs to insure that all residents have the opportunity for due process and representation in our judicial system. Locking people up and detaining them out of state without being charged for crimes is traumatic for them and especially their families. Young children are left without parents because ICE has determined that they didn't look right and have the wrong skin color. Please vote Ought to Pass on this important legislation.
