

Elizabeth-Ellen Clark  
Waterville, ME  
LD 2176

I would like to support LD 2176. I have hear about immigrants unlawfully detained, stripped of their rights, and not given due process. Some have been sent out of state, as far away as Texas, for detention. When the mistake is identified they are left without money, adequate clothing, and any means of transportation. Their cell phone may have been take away and they may have no way of contacting family and friends. Haste makes waste and Trump's haste and aggression in trying to deport people who are filling roles in our communities, paying into our social safety net, and supporting their families, is unneeded and unjust. Immigrants should be justly compensated when unfairly detained. The family should be compensated for the trauma they have experienced. We don't need more ICE agents. We need more immigrant lawyers and judges who will help to protect the rights of immigrants and their families.
