LD 785

It is imperative that the legislature promptly pass LD 785 with a resounding majority that will show Governor Mills that she must sign the bill into law. The Wabanaki Nations have an inherit right to self-governance and the resources afforded to other federally recognized tribes. The state of Maine, sitting on stolen Wabanaki land, must get out of the way of this right and stop its backwards attempt at control and subjugation. All in the legislature should get on the right side of history and support this bill, at a time when Governor Mills is in an election and may feel the political pressure and act as she already should have. Please pass this bill at once, and work to convince your colleagues to support it.
